Key Assortment Gaps Identified

1. Premium Whitening Systems Gap

No Up&Up Strips + Light Offering

2. Flavor Innovation Gap

No Mint or flavored whitening strips

3. Treatment Count Gap

No participation in 12–14 treatment count segments

4. Maintenance Whitening Gap

No direct size comparison to the category-leading whitening pen

5. Trade-Up Opportunity

Shoppers currently must purchase national brands in these segments

Whitening Sale Drivers

Treatment Length Research Shows XXct is Most Common

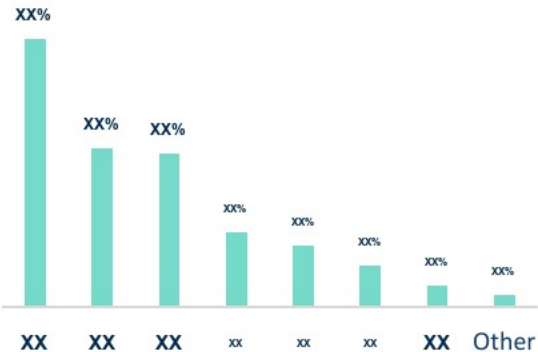

Recommendation: Offer 10ct as Base Assortment, offer XXct, 5ct, and 20ct

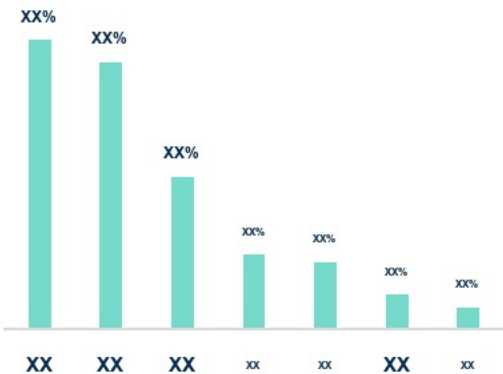

- XX Treatments is the most common Count Size purchased
- XX or XX Treatments is the most preferred (XX%) size offering
- XX% of users use all the strips in the package
- XX Minutes is the preferred wear time for strips

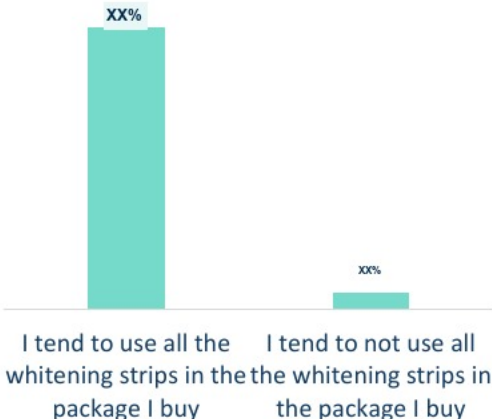

What package size (number of whitening strips) do you usually buy?

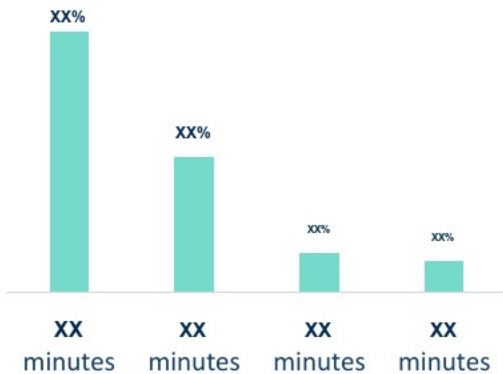

What would be your preferred number of whitening strips/pack size?

Which of the following statements describes you?

What is your preferred wear time for each treatment?

High Consumer Interest in Mint Flavored Whitening Strips

+XXM Dollar Opportunity

XX%

of shoppers who currently use whitening strips find flavored whitening strips appealing

"It would make them more fun and easy to use."

XX%

of shoppers are interested in purchasing flavored whitening strips

"Most teeth whitening strips have a bad taste and flavored ones would make them more pleasant to use."

>XX%

of consumers prefer mint flavoring

Shelf Strategy

Shelf Strategy- Grand Rapids, MI Location

Replace GuruNanda

1. GuruNanda undercuts Up & Up trade-down strategy in 7 treatment count segment
2. \$9.99 vs. Up & Up at \$12.59
3. Adjacent placement creates strong shelf blocking
4. Easy SKU-for-SKU replacement
5. Maintain mint demand with Up&Up Mint Strip
